DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-4 and 6-9 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 6, 7, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Hayashi (U.S. Patent Application Publication No. 2001/0033418).

Regarding claim 1, Hayashi discloses a projection display (see FIG. 1), comprising: an illumination source (see 2 of FIG. 1) for producing light; a light-dividing prism (see 3 of FIG. 1) for receiving light from the illumination source and dividing the received light based on polarization control; and a plurality of integrators (see 5-7 of FIG. 1), wherein the light received from the illumination source and divided by the light-dividing prism is provided to each of the plurality of integrators (see light provided to "integrators" 5-7 in FIG. 1).

Regarding claim 2, Hayashi discloses the projection display of claim 1 wherein each integrator is further coupled to one or more imaging devices (see 9 of FIG. 1, "integrators" 5-7 are considered to be coupled to "imaging device" 9 optically).

Regarding claim 4, Hayashi discloses the projection display of claim 1 wherein the light-dividing prism has one of a square shape and a rectangular shape (see 3 of FIG. 1).

Claims 6, 7, and 9 are rejected for same reasons as claims 1, 2, and 4.

Allowable Subject Matter

1. Claims 3 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

2. The following is a statement of reasons for the indication of allowable subject matter:

Claims 3 and 8 have been found to be allowable because the prior art of record either alone or in combination neither discloses nor makes obvious the projection display and/or projection system comprising the particular feature of the plurality of integrators being fiber integrators, in combination with the particular combination of features recited in claim 1 and/or 6.
